Subject: **PowerStor<sup>®</sup> – FC-3R6334-R Capacitor End of Life Notice**

To Whom It May Concern:

The Cooper Bussmann<sup>®</sup> PowerStor<sup>®</sup> supercapacitor part number FC-3R6334-R (F Series) is now nearing the end of its product life cycle and is scheduled for obsolescence.

At this time Cooper Bussmann does not offer a direct alternative to the FC-3R6334-R. We are currently reviewing our strategy concerning our future low-profile product offering. In the meantime our PA and PM Series supercapacitors offer similar electrical performance at a lower cost and, as such, provide an excellent alternative in many applications. (See Data Sheets 4306 and 4308 respectively at [www.cooperbussmann.com/datasheets/elx](http://www.cooperbussmann.com/datasheets/elx).)

We will do our best to minimize customer inconvenience by allowing the transition to proceed during the next few months. Orders for "End-of-Life" quantity purchases are being accepted through December, 2008, with shipments continuing into March, 2009.

The official **End-of-Life date is March 31, 2009.**

Please plan accordingly for the end of this part number's production. Cooper Bussmann personnel will assist with implementation as required.

I thank you for your cooperation.
